REFISA NENSEBO

Single Origin

The Refisa washing station is located in the Nensebo Woreda region where nearly 600 coffee farmers bring their ripe cherry to be processed. This lot consists of Wolisho and Kuruma Varietals grown at 1900 – 2070 masl.

65g per litre for filter styles and 1:2.5 brew ratio for espresso. We use 21g in and 50g out on our Sanremo Café Racer with 20g IMS baskets.

Super fruity and bright acidity up front, followed by citra hops and a buttery body
