TIMOR-LESTE

•  
PARAMI

This coffee consists of Hybrido de Timor and Typica varieties is produced by Parami villagers in the Ermera region of Timor-Leste at 1700-1800 masl. The coffee is wet processed at the Atsabe community mill and is dried on raised beds for around 25 days.

Try 65g per litre for filter styles and 1:2 brew ratio for espresso. We use 17.5g in and 35g out.

This coffee has bold baking chocolate notes followed by a sticky sweet raisin sweetness and a gentle raspberry acidity.
